Soon to be a graduate of computer science with experience working across the full-stack of software development. Individually built a few projects and looking for a role where I can grow and learn from other experienced team members.

Work Experience

Carmax – Customer Specialist III

June 2019 - current

Pleasant Hill, CA

- Train and develop new sales team associates in product inventory, selling techniques, and company standards
- Cultivate instant rapport, build, and maintain key client relationships to execute sales
- Ensure correct DMV paperwork processing, operating cash registers, and safe reconciliation for the largest Carmax location measured by trade-in transactions

Code 4 Kids – After School Program Instructor

August 2017 - June 2018

Brentwood, CA

- Set goals for students in 4-5th grade including creating lesson plans and delivering instructional activities based on each student's understanding of computers and programming
- Created a seasonal after-school curriculum diving into the basics of programming, its importance, and a small project using HTML & CSS tailored to 4-5th grade students

Projects

Talent Pipeline Web App – Frontend Developer

January 2021 - current

- Lead responsive design created with Figma and Adobe Illustrator following Material Design Guidelines
- Developed and modularized reactJS components including prop and state handling for efficient reusability and deployed NodeJS application on AWS EC2 Instance with Github
- Implemented using: AWS, Bcrypt, Bootstrap, CSS, Cookie-Parser, Express, Javascript, MySQL, NodeJS, and ReactJS

Multi-User Messaging Web App – Frontend Developer

January 2020 - May 2020

- Developed a responsive web app which allows users to create an account and message groups of people like Discord
- Integrated asynchronous HTTP requests to REST endpoints to perform CRUD operations with backend using Axios (a lightweight HTTP client based on the XMLHttpRequests service)
- Implemented using: Axios, JQuery, Java, JavaScript, MondoDB, NodeJS, React-Dom, ReactJS

Photo Management Web App – Developer

January 2020 - May 2020

- Designed user interface and features using AdobeXD and Adobe Illustrator
- Developed responsive web app which allows user create and account and search and upload images
- Implemented using: Axios, Bcrypt, ExpressJS, HTML5/CSS, Javascript, MySQL, NodeJS, and Passport

Computer Science Club – President & Co-Founder

April 2018 - April 2020

- Founded the computer science club at Los Medanos Community College to provide an on-campus space for programming enthusiasts to gather together, discuss coding, and assist each other with CS assignments
- Led club members into a LatinX in Tech competition held by Kapor Center in Oakland, California in which two of the club groups with club members won first and second place

Education

San Francisco State University – Bachelor of Science, Computer Science

2019 - current, GPA: 3.4

San Francisco, CA

Relevant courses: Software Development CSC413; Software Engineering CSC648; Security & Data Privacy CSC652; Intro to Database Systems CSC675

Los Medanos Community College – Associate Degree, Mathematics & Physics

2015 - 2017

Pittsburg, CA

Skills

JavaScript ES6 (Certificate through SoloLearn); C++; MySQL; HTML5 / CSS; DOM manipulation; React.js; RESTful APIs; Git; UI Design (Figma, Adobe XD, Illustrator, Photoshop)
